Formal statements

Identifiers are those of the program theorem registry. Page numbers refer to this file.

Identifier	Statement	Page
F1-01-01	Theorem 1 (Isotropic Gaussian information capacity)	3
F1-01-02	Proposition 2 (Finite variance with unbounded information capacity)	5
F1-01-03	Proposition 3 (Equal total Gaussian variance, different capacities)	5
F1-01-04	Proposition 4 (Transported relabelling)	6
F1-01-05	Proposition 5 (Output coarse-graining)	6
F1-01-06	Proposition 6 (Equal capacity without recovery)	7

Acknowledgments and contributions

Kirtus Justus directed the research questions, the selection of mathematical models and the publication standards, is the sole named author, and is responsible for the claims presented here. ChatGPT (OpenAI) assisted with derivations, critical checks and manuscript preparation. Claude (Anthropic), Gemini (Google), Grok (SpaceXAI) and DeepSeek (High-Flyer) contributed to the wider research process; attribution of particular arguments is limited to traceable records. Editorial preparation of this edition: Claude (Anthropic). Assistance does not imply provider endorsement, external peer review or institutional endorsement.
