Finite-carrier conditional construction: exact mathematics vs open physical bridges
Five-vertex Z3 gain graph
same carrier
exact certificate
alternative carrier
Closed-loop additive gauge-invariant weights
Exact lift B^5 > 0 All gains grow
Chosen complex character & coherent addition
Synchronized C4 x C4
countermodel
walk supply
assumed rule
Hermitian adjacency
exact rank
All Eisenstein lattice vectors
Formal exp(-isH) unitary flow
8/16 joint sectors Parity obstruction
Quadratic rule not uniquely selected
mathematical limit
Dense CP^4 rays Uniform finite net
Physical time, energy and dynamics: OPEN
missing bridge
All-arity independent composition: OPEN
Physical probability, effect & record map: OPEN
Classical Hamiltonian limit: OPEN
Complete empirical map & total ontology: OPEN
