Local Number-Conserving Response and Inference

Kirtus Justus

Theoretical Physicist

Port Coquitlam, British Columbia, Canada

Baseline edition, 12 November 2026

Contents

Part	Title	Page
1	Local Number-Conserving Response and Inference	2

Formal statements

Identifiers are those of the program theorem registry. Page numbers refer to this file.

Identifier	Statement	Page
C6-01-01	Proposition 1.1 (Positive local particle-hole spectral measure)	3
C6-01-02	Corollary 1.2 (Exact mass and curvature of the spectral measure)	3
C6-01-03	Proposition 1.3 (Sequential occupation measurements)	4
C6-01-04	Proposition 1.4 (An exact finite-range curvature counterexample)	5
C6-01-05	Proposition 2.1 (A stable short-time map in the squared scale)	6
C6-01-06	Theorem 2.2 (Conditional confidence for the neutral response)	7
C6-01-07	Corollary 2.3 (Diameter and the zero-scale boundary)	8
C6-01-08	Proposition 2.4 (Static identification of dimensionless mass)	9
C6-01-09	Corollary 2.5 (Joint mass and scale uncertainty)	10

Acknowledgments and contributions

Kirtus Justus directed the research questions, the selection of mathematical models and the publication standards, is the sole named author, and is responsible for the claims presented here. ChatGPT (OpenAI) assisted with derivations, critical checks and manuscript preparation. Claude (Anthropic), Gemini (Google), Grok (SpaceXAI) and DeepSeek (High-Flyer) contributed to the wider research process; attribution of particular arguments is limited to traceable records. Editorial preparation of this edition: Claude (Anthropic). Assistance does not imply provider endorsement, external peer review or institutional endorsement.
